- Duplex Scanner
- Scan Up to 55 Checks per Minute
- MICR Reader
- Ideal for Teller Counters
- Requires Minimal Training
- Smooth and Reliable Operation
- Plug and Play Connectivity
- Quality Control Features
- Remote Deposit Capability

Check 21 was designed to streamline the check processing system. Scanning with CAMS-ii Check 21 Tell-Scan makes it faster and more efficient. In the past, paper checks were physically transported from place to place or scanned en masse through the back office. Now, digital images can be scanned at the teller line and sent virtually, through an electronic cash letter.

Check 21 Tell-Scan will simplify your daily procedures and enhance your bottom line by reducing expenses associated with check processing.

Benefits

Scan and Go

Teller captures check image at the front end, which eliminates further handling of checks by back office personnel.

Easy Access

One-click-viewing allows staff to quickly retrieve check images from standard member balances screen.

Auto Identification

Members payroll checks are easily identified to allow SEG-based hold exemptions.

Compliant

Compliance is assured through automatic recognition of routing and transit numbers and assigning check type and hold information, the need for teller decision making is greatly reduced.
